Profile

Highly driven Software Engineer with a relentless pursuit of excellence in the IT sector. A firm dedication to continuous learning and career development, combined with a passion for delivering innovative solutions and a strong desire to enhance the productivity of diverse, collaborative teams.

Experience

Backend Developer | 2023

ELANDZ, VAASA

- Drove the development of high-quality software, simultaneously gaining a wealth of knowledge in Python, C, and collaborative teamwork.

Projects

Prayer Time Display Web App

- Developed a web app using JavaScript and APIs to manage schedules, which displayed real-time information on my room's TV through a Raspberry Pi. Improved personal productivity with an easy-to-use interface.

Student Data Management System

- Developed a Java-based Student Data Management System using JDBC for efficient data integration and a user-friendly interface, enhancing student record management.

Card Game Python(CLI)

- Developed a Python-based card game application, showcasing expertise in data structures and modular functions for game logic, user interaction, and multiplayer support.
